Dmitrii Artemev

Frontend developer
Machine Learning Researcher
Looking for a long term job or graduate program

Career Objective

A passionate developer with a strong foundation in frontend technologies, particularly ReactJS, coupled with a growing interest in fullstack development. Experience in building user-friendly and responsive web applications fuels a deep curiosity about the entire development cycle, from server-side logic to database management. Eager to further develop skills in these areas and contribute to projects by collaborating across both frontend and backend teams to deliver comprehensive solutions.

Education

- Master of Information Technology, Whitireia and WelTec, Expected 2024
- Intelligent systems, at Peter the Great St. Petersburg Polytechnic University, 2023
- Institute of Mathematics and Informatics Yakut State University, Yakutsk, 2002-2007 (Specialty - Mathematician, system programmer)

Portfolio

Skills

- Frontend Development (ReactJS): Experience in building responsive and dynamic web applications with a focus on intuitive user interfaces. Prior to using ReactJS, worked with jQuery, Bootstrap, and ASP.NET.
- Backend Development: Learning and using Node.js to create server logic and interact with databases. Participated in projects integrating frontend with backend, primarily using Node.js with Express. Some experience with Flask.
- Database Management: Basic knowledge of database management using MS SQL and MongoDB, including creating and optimizing queries and designing data schemas.
- Communication and Teamwork: Strong communication skills with a proven track record in successful teamwork.
- Ongoing Learning: Actively studying and applying machine learning methods to web development projects.

Projects and Professional Development

- Comleting Research Project on Application of AI in the Conceptual Stage of BIM
- Studying ML and its application in web projects
- Completed the AWS Cloud Course
- Finished an interesting project on image classification with Kaggle dataset
